

Brian Annan, PhD

021 659 302

Brian is highly skilled at supporting school leaders and enthusiastic lead teachers to identify and address achievement challenges. He acknowledges strengths within the team and provides advice to build on what your group already know. It is one thing to identify academic challenges; it is another to pin-point academic, social and emotional needs that underlie those challenges. Brian supports groups to get beyond surface features and test possibilities until student learning and well-being is on track. Brian's expertise in schooling improvement will provide you with foundation advice about becoming sharply focused on student strengths and needs, conducting disciplined inquiries and evaluating for impact. Brian is equally skilled at energising groups to create innovative learning environments, which focus on collaborative networking and lateral learning among teachers, students, families and whānau.

Brian's recent developments that will help support your CoL,

- Programme Director, **Learning and Change Networks (LCN)**. Overall impact was a 24 percent positive gain towards National Standards among priority learners (MoE, Milestone 5, 2015).
