

# Activity 10. Create your personal data set

Now collect your data about your Infinity Learning Map 2.

- Take a digital photo of your map. Ask the teacher where to save the photo
- In pairs, go somewhere quiet and make a short (2-minute) video to explain each other's maps.
  - In the video,
    - describe your Learning Map
    - talk about the interactions on your Learning Map
    - explain your area of improvement
    - describe what you will do differently to make the improvement
    - explain how your teacher, friends, family or other can support you with your improvement.
  - **Note:** the sound needs to be clear and easy to hear.
  - You can produce the video in many different ways, e.g.
    - Stand and hold your map to one side and explain it with a classmate filming you,
    - If you do not want to be in the video, put your map on a desk and have a classmate or you video the map while you explain it, or
    - Screencastify.
  - You might want to compare your most recent map with your other maps and talk about what has changed to improve your learning.
  - Ask the teacher where to store your video
- Complete your google form. Ask your teacher for the link.
